

Monthly performance report

August 2026

1 August 2026 – 31 August 2026

Prepared by
GET BEE SEEN

What happened this month?

August 2026 was driven mainly by Instagram Reels, which averaged 10.6K views per piece against 5K for Posts. 98.4% of views came from people who do not yet follow the account, while net follower growth was +49. Paid media on Meta produced 363 messaging conversations at ₹23.35 each.

Key takeaways

- 01 Reels were the strongest discovery format, averaging 2.1× the views of Posts.
- 02 Non-follower visibility was high: 98.4% of views came from new audiences.
- 03 Follower conversion is an opportunity: 81,560 views produced +49 net followers, about one for every 1,664 views.
- 04 Meta campaigns generated 363 direct messaging conversations at ₹23.35 each.
- 05 Next month's focus: repeat what worked in the 14 Aug reel and improve what happens after someone watches.

What we worked on this month

7	4	3	0	1
pieces published	Reels	posts	carousels	paid campaign

Content strategy	Created and published 7 pieces of content (4 Reels, 3 posts) focused on product visibility, brand positioning and audience engagement.
Social media	Marked 15 Aug with a festival post to stay present in the community's conversation.
Reels	Published 4 Reels designed to reach new audiences; 98.4% of views came from non-followers.
Paid media	Managed 1 Meta campaign focused on generating direct enquiries, with ₹8,474.59 in spend over the period.
Optimisation	Reviewed performance across all 7 pieces and identified the 14 Aug reel as the strongest for views (12.9K).

What happened

August delivered strong discovery: 98.4% of 81,560 views came from non-followers. Reels were the main reach driver, while follower growth (+49) stayed far smaller than total content consumption.

What this means

Most people watching are new to the brand. That is valuable for awareness, but it also means few of them are being turned into followers yet. At this rate it takes roughly 1,664 views to earn one follower.

What we should do next

Add a clear follow or enquire prompt to the highest-reach Reels, and keep publishing the formats that reached new audiences.

Not in uploaded data: profile visits, website clicks, organic messages.

Top by follower conversion

Insufficient data to determine.
Per-post follower data is not in the uploaded screenshots.

Reading across the tiles: the piece with the most views is not always the piece people engage with most, which is why no single ranking is used.

What worked, what did not, what to test

Content themes

Theme	Pieces	Avg views	Avg engagement	Best piece
Behind the scenes	1	11.4K	0.76%	20 Aug
Educational	1	9.9K	0.88%	26 Aug
Product showcase	3	8.6K	0.98%	14 Aug
Festival	1	6.2K	1.72%	15 Aug
Engagement	1	3.9K	1.55%	23 Aug

Visual patterns such as human presence, close-ups or text hooks: Insufficient data to determine. Upload the creative files to enable cover-level analysis.

What worked

Reels reached more people: 10.6K average views against 5K for Posts.

The 14 Aug reel (product showcase) led on views, reach and shares.

Behind the scenes content had the highest average views (11.4K).

What did not work

Posts earned fewer views per piece (5K) than Reels.

Engagement content had the lowest average views (3.9K), from 1 piece.

No carousels were published, so there is insufficient data to compare them.

What to test next

Test a follow or enquiry call-to-action on the top-reaching Reels and compare follower gain per 1,000 views.

Publish 2 carousels to learn whether multi-slide content improves saves and shares.

Use Posts for conversation and engagement (1.54% average engagement rate against 0.81%), and Reels for reach.

Campaign performance

Campaign	Objective	Spend	Results	Cost / result	Reach	Impressions	Frequency	CTR	CPC	CPM
Thrishank - Messaging conversations	Messages	₹8,474.59	363	₹23.35	39,030	115,004	2.95	Not in data	Not in data	₹73.69

Campaign observation

The campaign generated 363 messaging conversations at an average cost of ₹23.35 per conversation.

Client-friendly interpretation

At the current spend level the campaign is successfully generating direct conversations. The next focus should be improving the share of conversations that become qualified enquiries. No sales claims are made without sales data.

Paid media insights

Data	₹8,474.59 in spend produced 363 messaging conversations at ₹23.35 each. Ads were shown 115,004 times to 39,030 people.
Observation	On average each person saw the ads 2.95 times. The cost of reaching 1,000 views was ₹73.69.
Interpretation	The campaign is generating direct conversations at a steady cost. The uploaded data does not show how many of these became qualified enquiries, so conversation quality cannot be judged yet.
Action	Track which conversations turn into qualified enquiries and test two or three creative angles at a similar budget, so the cost per conversation can be compared fairly.

Organic and paid together

Platform definitions differ, so figures are placed side by side, not added.

Visibility by source

Organic: Instagram views		81,560

Business impact

Reach, engagement, enquiries and sales are different things.

115,004

ad impressions

Brand visibility

Paid ad views, plus 81,560 organic Instagram views.

98.4%

of views from non-followers

Audience discovery

How much attention came from people who did not already follow.

363

messaging conversations

Direct enquiries

People who started a message conversation after seeing an ad.

Not available

Sales and revenue

Sales attribution not available in current reporting data.

Visibility, discovery and enquiries are different things. Views and impressions show how many people saw the brand. Non-follower share shows whether new people are finding it. Messaging conversations show people raising a hand. Qualified leads, bookings and sales only appear when the client provides them.

Next month strategy

Content	Increase the share of Reels in the content mix: they averaged 2.1× the views of Posts. Keep Posts for storytelling, where engagement rates ran higher (1.54% against 0.81%).
Paid media	Keep the messaging campaign running and test two or three creative and message angles, while tracking the quality of the 363 conversations.
Audience	Protect the strength in new-audience reach (98.4% non-followers) and give new viewers a reason to follow, such as a recognisable series format.
Creatives	Rebuild the structure of the 14 Aug reel (12.9K views). Visual traits need creative-file review, so treat them as hypotheses.
Conversion	Add stronger follow, profile and enquiry prompts to high-reach content. 81,560 views earned +49 net followers.

Action plan

Action	Why	Priority	Owner	Timeline
Create 6 Reels built on the structure of the top Reel	Reels averaged 2.1× the views of Posts	High	GBS	Next month
Test 3 follow or enquiry call-to-action variations	About 1 follower per 1,664 views	High	GBS	Weeks 1 to 2
Test 2 to 3 new creative angles on the messaging campaign	Baseline cost per conversation: ₹23.35	Medium	GBS	Next month
Share which conversations became qualified enquiries	Sales attribution not available in current reporting data	High	Client	By the 7th
Publish 2 carousels	No carousels this month: insufficient data	Medium	GBS	Next month
Provide last month's Insights and Ads screenshots	Unlocks month-over-month comparison	Low	Client	With next upload

Next month focus

Scale what reached new people

Make Reels the backbone of the content calendar.

Measure enquiry quality

Agree how qualified enquiries, bookings and sales get reported back.

Turn viewers into followers

Raise on-screen and caption prompts. Baseline: 1 follower per 1,664 views.

Test new formats

Carousels and call-to-action variants, with results compared fairly.
